

KeyMitt opens, scans, processes, and tracks incoming remittance mail from customers.

Mail / Checks

- Use one solution for all inbound mail
- Reduce the amount of time spent on the prepping and sorting of mail
- Handling combinations of checks, stubs, and lists.

MAIL / CHECKS

// Capture

Capture

- Image all documents right out of the envelope with very little handling
- Reduce manual keying of information

KeyRules for AR

Integrate with your billing or line of business application

KeyMitt's electronic archival saves time, space and money through faster retrieval. It also allows multiple users from different locations to retrieve, view, print and distribute files.

e-posit™

- Generate ICL to the bank with e-posit.
- Remove existing antiquated encoding/endorsing hardware
